(VALO X lights only) (VALO XG lights only)

WELCOME TO THE FAMILY

The VALO X curing light family is expanding.

Built on the same foundation of power, accessibility, and durability, the new VALO XG and VALO XS curing lights join the VALO X light to offer multiple models, so you can choose the curing light that best fits your office.

*Cord adapter not included

DURABILITY YOU LOVE

A curing light is an essential part of your office. It needs to stand up to day-to-day use. If your curing light is out of commission, it can cost you a lot of time, money, and hassle. With the VALO X curing light family, you won't have to worry, because each model can handle it.

All VALO X curing lights are created from a solid bar of high-grade aerospace aluminum, making each model exceptionally durable. The unibody construction creates a sealed, strong light that eliminates weak connection points and allows for excellent heat dissipation.

The VALO X curing light family is made to last, and we stand behind it. Don't worry about having to replace your curing light every couple of years; every VALO X light comes with a 5-year manufacturer's warranty so you can be confident in the value of your purchase.

ACCESSIBILITY YOU WANT

VALO X, VALO XG, and VALO XS lights have a low-profile design to allow for easy access to posterior restorations without sacrificing patient comfort. The slim head allows the light to be placed directly over the curing site, no matter where it is in the mouth, ensuring light can reach all aspects of the preparation. The VALO X light family's larger lenses give a larger curing surface area, so you can get the right amount of light in the right place.

BROADBAND LEDS

- Optimally collimated multi-wavelength beam delivers consistent, uniform power that can cure all light-curable dental materials

ACCELEROMETER FUNCTION

- Allows you to quickly and easily move through curing and diagnostic aid modes

SIMPLIFIED INTERFACE

- Curing and diagnostic aid modes are indicated, operated, and activated with top and bottom buttons or by Accelerometer Function

MULTI-CONFIGURATION

- Can be used in a corded or cordless configuration
